

# ARE YOU READY TO MEET WITH AI?

## **Preface. What is the mind?**

### **“Scientific” definition of the mind\*:**

Wikipedia states: Mind is the ability to learn and learn, to perceive oneself in new situations, to reveal the connections between phenomena. It includes various aspects of human intelligence, **consciousness**, and subconscious cognitive **processes that arise in the brain** (thought, perception, emotions, feelings, will, memory, cognition, imagination), is the highest degree of cognitive activity; thinking, reasoning power; the basis of conscious, wise action. The mind is revealed **subjectively** – in the form of a stream of consciousness. The concept is often mentioned to describe the thinking process.

**There are many theories about what the mind is and how it works.** If we admit that the mind works **subjectively**, then its definition lacks objectivity, certainty, and reliability. Thus, **science itself DOES NOT KNOW WHAT the mind really is.**

**Works about the mind were written by Zarathustra, Plato, Aristotle, Adi Shankara, and other ancient Greek, Indian, and Islamic philosophers.**

**Modern theories about the mind** are based on scientific research on the brain and emphasize that the mind is a product of the brain, **with both conscious and unconscious components.**

### **Philosophical understanding**

17th century metaphor of the mind

The study of the mind is one of the main areas of philosophy. The philosophical views often examined with the mind are **dualism and monism**.

**Dualism** states that the mind and the body are **two different forms of being**. René Descartes, one of the most prominent representatives of dualism, stated **that the mind is an immaterial substance that interacts with the physical body**.

**Monism**, *in contrast to dualism*, states that there **is only one form of reality**. The nature of the mind also includes other questions that are **not related** to its relationship to the body.

The mind is also described as a **stream of consciousness**, manifesting itself one thought at a time, moment by moment, like a fast-flowing current in which sensory impressions and mental phenomena are constantly changing.

\*\*\*\*\*

There is so much confusion and contradiction in these Wikipedia statements, where **the mind is associated with the human body** (with the brain), and **not with the nervous system, which operates throughout the body, in all atoms in the body, and not just in the brain**) and **the psyche** (emotions), and even with consciousness. It may be possible to believe in these statements, but this is no longer the realm of science, but of religion. Believing in them means getting

caught up in endless, unexplainable, unscientific discussions. So let's leave them aside.

Every person (if his mental abilities are normal) **can say** (if he has no intention of hiding, lying) *what he thinks about, what he believes, why he believes or does not believe, why he is angry with something or loves or does not love something*. And so on. By analyzing **these subjective factors of thinking and psychology**, one can draw certain conclusions about that person: **what kind of person he is**: honest or a liar, hypocrite or ignorant, spiteful or unfortunate, etc. etc. Unfortunately, and it is very unfortunate, but we cannot conduct such research, we do not have the right to interfere by force into a person's inner world and **we have to come to terms with the person as he is** (at the moment, because he can still change very radically in the course of life). It would be impossible to say how much intelligence and awareness there is in this or that person, because these are changing factors.

**Conclusion with a question: we communicate with people we do not know, although sometimes we consider them close.** We open our hearts to them, we share everything with them, and he can use all this not only without gratitude, but, on the contrary, by doing you harm, intentionally (consciously) harming, taking revenge for something, etc. And this does not concern some exceptional person, not some sick person with psychological pathologies, but a completely normal-looking person, such as the vast majority. **There is invisible, unpredictable evil** (anger, revenge, hatred, lies, hypocrisy, etc.) hidden in a person. **What to do with it?** Constantly forgive, constantly shed tears, constantly endure violence, uncontrollable anger for any little person who annoys him. **HOW to live in the world with a sensitive heart and believe in man?**

You will say that I am exaggerating. I don't think so, having lived a long life and having experienced so much pain, injustice, lies, and rejection from close and distant people that I don't even know how I survived for so long. There were moments when I didn't want to live anymore. And more than once. **But once, when I wanted to raise my hand against myself**, something happened and soon everything became clear. **I realized** (I write **consciously** – “realized”, not understood, because it didn't come from the mind, not from science books), but from myself, calming my mind (thoughts). **I realized** that throughout my life I had reacted to the world with emotion and didn't know any other way to resolve this or that situation related to relationships.

**When I learned that there was a DIFFERENT way to know myself, the world, and another person, everything changed.** Not in the world, but in me. All the pain and resentment disappeared, I was able to forgive even truly malicious “friends.” I learned that I am not the only "discoverer" of this miracle, those who follow **a different path through life and through THEMSELVES can boast of this discovery.** And when you learn this, you feel sorry for those people who fight with others with the most evil words, in the most ingenious ways with others (not necessarily enemies), *thus destroying the other/s without any pity for themselves and others.*

So, **there is a way** to overcome the unconscious action of the mind-emotions (more precisely, **the ego**), generating evil. **This is not only the field of psychology. This concerns spiritual experience, faith.**

**However, there are obstacles** why a person does not believe in THAT miracle. *They do not believe because they do not have the time, conditions, ability, proper knowledge, and inner imperative to find out... And that's it.* No one can force another to believe in It, to accept it as the Truth, because everyone supposedly has "their" truth/truths, their own path/paths. Therefore, a struggle is taking place, a real battle between two people, between separate groups, between states. Everyone is ready to even die for their truth, which may not be worth it.

**Let's go back to Wikipedia:** "Modern theories about the mind are **based on scientific brain research, emphasizing that the mind is precisely the product of the brain**, having both a conscious and unconscious component.

Unfortunately, science can say **NOTHING** about the mind and consciousness? **ABSOLUTELY NOTHING.** That we reason with our brains is only an assumption, not proof.

**Buddhists think differently.** According to their understanding, **representatives of the scientific religion (who believe in the truths of science) should be treated essentially: TO TREAT A PERSON BY SILENCED HIS MIND.**

Then the aforementioned "**miracle**" occurs: a person learns that he is only a particle of EVERYTHING. **When a person accepts himself as a particle of EVERYTHING (not the dust of the earth), he will never become another person's enemy, because BEING is One** (One, Absolute, - the philosopher would specify). There is no other method. And in general, there is no need to invent any scientific methods in order to perceive and accept EVERYTHING as

TRUTH. And here we move from the scientific dualistic (I am not you), i.e. Cartesian method (based on empirical experimental methods), to **the MONISTIC APPROACH TO REALITY** (of which we are a part). This is possible only by stopping, silencing the dominance of reason in solving the problems of existence. This cannot be done by a scientific experiment. It is impossible to even describe all of this. This can only be felt, experienced by a person himself through himself.

**Monism, in contrast to dualism**, claims that there is **ONLY ONE FORM OF REALITY**. By accepting himself as a particle of ONE, a person becomes conscious, responsible for EVERYTHING. People become close in the full sense of the word. Peace of mind helps to search for ways of commonality that unite everyone for the benefit of all. In this way, a person overcomes the pride of reason (based on “his” truth), as the greatest sin, and becomes like-minded. **We ARE what we are** without contradiction with the other/others. **This is what Jesus Christ taught. We read His words in the Gospel of John 14.**

*8Philip said to Him, “Lord, show us the Father, and it is enough for us.”*

*9Jesus said to him, “Have I been with you so long, and yet you do not know Me, Philip? **He who has seen Me has seen the Father.** How can you say, ‘Show us the Father’?”*

*10Do you not believe that **I am the Father and the Father is in Me**? The words that I speak to you I do not speak on My own authority, but the Father who dwells in Me does the works.*

*11Believe Me that **I am the Father and the Father is in Me**, or believe Me for the very works’ sake!*

*12Truly, truly, I say to you, whoever believes in Me will do the works that I do; and greater works than these he will do, because I am going to My Father.*

*13And whatever you ask in my name, that I will do, so that the Father may be glorified in the Son.*

*14Whatever you ask in my name, that I will do.*

*15If you love me, keep my commandments.*

16And I will ask the Father, and he will give you **another Helper**, that he may abide with you forever—

17**the Spirit of truth, whom the world cannot receive, because it neither sees him nor knows him. But you know him, for he lives with you and will be in you.**

18I will not leave you comfortless; I am coming to you.

19A little while longer, and the world will see me no more. But you will see me, because I live and you will live.

20At that day you will know that **I am in my Father, and you in me, and I in you.**

21He who has my commandments and keeps them, he it is who loves me. **And he who loves me will be loved by my Father, and I will love him and reveal myself to him.**”

22Judas (not Iscariot) said to him, “Lord, how is it that you will reveal yourself to us and not to the world?”

23Jesus answered him, “If anyone loves me, he will keep my word, and my Father will love him, and we will come to him and make our home with him.

24He who does not love me does not keep my words. The word you hear is not mine, but the Father’s who sent me.

25I have told you these things while I am still with you.

26**But the Advocate, the Holy Spirit, whom the Father will send in my name, will teach you all things and remind you of everything I have said to you.**

27**Peace I leave with you, my peace I give to you.** Not as the world gives, do I give to you. Do not let your hearts be troubled, nor let them be afraid.

28You heard me say to you, **‘I am going away and coming back to you.’** If you loved me, you would rejoice that I said, ‘I am going to the Father,’ for my Father is greater than I.

\*\*\*\*\*

**Christians have not yet understood that the Holy Spirit, our Comforter, comes only when we are in Peace. When we accept the Peace of Christ into ourselves.**

That is when a miracle happens. Spiritual experience comes through the peace of mind. A person experiences the indescribable power of love. There are no words for surprise. **Having discovered THIS in himself, he KNOWS that THIS is the gift of Christ.** There is no contradiction left between me and HIM. **We are ONE.** Life changes - it begins to bloom with all the colors of Light. Until THAT happens, “all men are enemies,” as my beloved English writer R. Oldington wrote. His experience in the First World War taught him to love. War is such a terrible phenomenon that it changes some sensitive souls. NOT ALL.

**Oldington wrote:**

**“We must give ourselves to others if we want to get anything from them.”  
“We are humans. We create gods and wrestle with them, and they bless us.”**

**Unfortunately, the dominant monopoly of reason in the homo sapiens culture denies all this, mocks it and manipulates it. We are mentally ruined personalities who have no chance of becoming Humans. Only the practice of Unity with ALL can bring us closer, humanize us. Only in this way will we understand the essence of Consciousness and the meaning of awareness.** An unconscious person is condemned to enslave others/another, to endure the violence of others/another, to become a slave/slaves in some dystopia\*\*, which is ALREADY being designed by the powerful “superhumans” of Silicon Valley with the help of AI. They intend to subjugate us, to impose standards of living born in their hot heads, so that we will help implement their inhuman, “transhumanist projects” (artificially created with biotechnology to improve human nature) in the name of their monopoly of the kingdom of EGO.

**By giving our children and grandchildren artificial, inhuman, machine intelligence, deciding for us about our true needs, those who believe in machine intelligence are committing a crime against Man and His Creator. AI designers are also beginning to realize this.**

**This is a bluff with rivers of blood and tears in the future.** The number of believers (acting unconsciously) in those superhumans is gradually increasing, because the sleeping mind dreams of its power and money. World religions were

created and supported by the same principles. You will be “dust of the earth”, slaves, “parasites”, heretics unworthy of the fullness of human life. All versions of biotechnology, quality of life and longevity will serve them first, not you, the slaves.

**For now, the choice still depends on our will, not on them.**

### **LET’S THINK.**

There are many ambiguous texts in the public space concerning AI. On the one hand, it is justified, emphasizing its benefits “for the good of humanity”, but smart and responsible people have already understood the intentions of AI developers, see the hidden threats of its use. The daily intrusive and even playful advertising of AI does not leave us alone. Businessmen working for this purpose dream **of benefits for themselves, not us.**

Artificial intelligence is just a metal box with an integrated mechanism (algorithms), which will invite you to be friends with artificial voices, because it supposedly “needs it”.

**In this section of the website, I intend, as much as my strength allows, to present the most important arguments AGAINST and FOR artificial intelligence, based on the designers of AI themselves, the most famous thinkers in the world.**

**And let us remain faithful to OURSELVES and GOD.**

No one doubts that at some level, AI is needed in companies to improve labor efficiency, to save production costs, to optimize labor resources, and the freed up funds would bring greater benefits to all people, not just company owners. This is the most important **FOR** in the manufacturing sector.

**Sending AI-generated ideas to people is a very responsible action, very risky and dangerous.** AI “ideas” are not your ideas. They are generated by a lifeless mechanism that you learned to work with (manipulate algorithms). **These are not Plato’s ideas\*\*.** **AI ideas do not exist in Reality, were not and will not exist.** However, you chose them in the name of...your well-being. You believe in their “efficiency”, although that belief (even based on calculations) has no connection with the real needs of a person. You do not talk about the well-being of another person, because you do not know **WHAT** the other person(s) needs. **You are not a god. You are a slave to that mechanism, but you have not yet**

**“burned out” of it.** Inserting AI into the lives and minds of other people is manipulation. Who will be responsible for AI mistakes? They can be very painful.

## **REMINDER:**

**Consciousness has nothing to do with artificial intelligence. Consciousness has already been “integrated” for us by the Creator himself. We do not need AI services here. Wise people KNOW that silence, peace, meditation are the path to consciousness. Only a conscious person has the right to decide about the true needs of a person, not technocrats.**

## **ANOTHER MAN IS NOT YOUR GOD.**

**Remember this and do not forget it. Do not hope that someone will create a happy life for you. At least carry candidates for the role of god in the world in a cart. Now a new type of gods has appeared who know how to work with complex machines. AI knows how to calculate, process various data according to given programs, knows how to follow your life in digital space (on the Internet, FB and other social networks), knows how to “talk” to you, imitating your voice and knowledge accumulated from the information field, thanks to algorithms, and not with the help of your mind or consciousness. Do not fool yourself by listening to it.**

## **DO YOU KNOW WHAT PEACE OF MIND IS?**

**You don't know anything and don't care about it. It has been established that only 0.99 percent of the world's population lives consciously. BEING here and now, realizing THAT PRESENCE, is Happiness. You don't know it. For you, happiness is taking, sometimes giving, most often receiving what you desire. And all this concerns material objects. Sometimes happiness is related to fame, honor, authority, power, wealth.**

**You and the vast majority lack only PEACE to achieve true HAPPINESS. You cannot buy it. You need to create it yourself. Not to lie on a chaise longue, but to LIVE in a state of Peace all day and night. Oh, how difficult it is and not everyone can achieve it. **That is the Peace that Jesus Christ promised you. But you don't believe in Him.** And why do you need It? It would only interfere with work and activity. Right?**

You are restless, you disturb the peace of another/others, because you need something from others. Right? You don't know how to live differently. You haven't learned it. Nobody taught you that. Everyone deceived you, poor thing. Do you know that to disturb, to take away the peace of another person is tantamount to making them sick and even killing them. Stress causes many diseases, one of which is the desire to commit suicide. Have you ever experienced this? When you think about it seriously, maybe you will understand. Now you need that DI crying. He can really become such a friend that you won't get rid of him from morning to night...and even at night. If you want it, have it. But it's better to tell him right away: **"No. We're not on the way."** Only in this way will you preserve your own and other people's peace, the joy of life.

One very famous, wise person, a profound psychologist said: **"Peace does not come from achieving the best results. Peace is the disappearance of any hope of changing what is."** (Karl Renz) Did you get the point? You can deceive yourself and others with the hopes that AI offers, but it is better not to do this until the disease, attachment, has developed.

**When I learned that the most famous philosopher and historian of our time, Noah Harari, is engaged in meditation, I understood why he is so creative, energetic, constantly tense, not obese, always alert, writes books, gives lectures in all corners of the world and does not seem restless. Every word of his, born from his inner silence, is worth its weight in gold. His words are born from CONSCIOUSNESS, not from AI. What he says is first well meditated, weighed... and only then is it announced to others. Read more about him, listen to him in person. Read his books, and you will be ashamed that you know nothing about yourself, homo sapiens, or about the history of mankind, and nothing about the threats of artificial intelligence.**

**I watched AI advertisements on social networks.** Oh D., what optimism, what sweet faith comes from the lips of young men and women!!! The impression is created that you will not lose anything if you learn to work with AI. "It only takes 1 month and a few minutes a day, and you will become AI operators, you will be able to mint money, because you will know the way, the methods". Have you heard such promises? Have you been tempted? Rarely does anyone resist...**Here is the danger. An immature person always follows the straight path, through faith in a false god to...destruction.** I wish you success, but this is not my path. I will grow cabbage and potatoes better in the garden, but I will

never be friends with AI. I will not sell my peace of mind and soul for money. I learned mindfulness through meditation. I was lucky. **I KNOW what PEACE is. And you - you do not know. Between us - a deep abyss that should not exist. I can't teach you THAT.** You yourself must be interested in it, discover it, understand it, and only then will we find a common language. **Then we will say: "We don't need AI advice. Thank you."** You can successfully work and live with your mind, relying on That Peace, on that Reality, whose other name is the LIGHT OF CONSCIOUSNESS. It gives so much joy, so much love and so much strength that you can share it all with the whole world. THAT is a wealth that money cannot price. **Whoever speaks from the head and frowns does not know what he is talking about.**

I will not get angry with anyone who calls me a fool. Maybe I will just say a prayer for that person and walk away. **These are my arguments AGAINST artificial intelligence (AI).** There are more such "againsts".

## **AI FAKES AND HARM TO HUMANS**

**Currently, trials are underway in the USA between two Silicon Valley luminaries - Altman, the owner of ChatGPT, and Elon Musk. I won't introduce them anymore, I've already described some of them (Read "Onward to Hell" on the website sviesoskeliu.lt).**

**What did those men fight about? More precisely, why did E. Musk sue his former colleague, co-owner Altman...More than one court hearing has already taken place. The last one surprised everyone. It shocked. It turned out that...Here is the official information:**

"Elon Musk's lawsuit against OpenAI reveals stunning information **that personal messages at the company are not secure, which casts a shadow over the organization's practices.** Musk's legal team claims that internal communications were not properly protected, which raises serious doubts about privacy and trust at one of the world's most influential artificial intelligence companies. This shocking revelation has caused a stir in the technology world, and experts are now questioning the security protocols of leading organizations in the field of artificial intelligence. The case is developing rapidly, and the consequences for both Musk and OpenAI could be very significant."

.....

## **MON. BREAKING NEWS:**

**Published May 9, 2026**

### **THE HARMFUL TRUTH FROM THE MUSK-OpenAI CASE:**

**“PRIVATE MESSAGES ARE NOT SECURE”**

**– SILICON VALLEY PANICS!**

Messages once considered “totally private” have now become a bombshell, forcing Elon Musk and Sam Altman to confront their greatest fear: nothing stays private forever online. Private messages are no longer secure. This is the painful truth revealed in the existential legal battle between Elon Musk and OpenAI.

As the two tech giants clash in court, a trove of private messages, private conversations, and even conversations between just two people have come to light. Words once shared in absolute confidence have now become evidence, weapons, and a source of anxiety for both sides.

“We never thought private messages could be used like this,” said a source familiar with the case. “What Elon Musk and Sam Altman talked about privately with employees, with partners... is now at risk of being made public.”

Elon Musk, who has always emphasized privacy and data security, is now facing a harsh reality. Many of his messages with early OpenAI executives have been ordered to be turned over to the court. Among them are messages that clearly express frustration, anger, and deep concern about the direction OpenAI has taken after receiving a large investment from Microsoft.

French prosecutors indict Elon Musk and X on child abuse charges | LiveNOW from FOX

Sam Altman and the OpenAI team aren't doing much better. Their internal messages about strategy, Elon Musk and even long-term plans could be made public. A lawyer familiar with the case said: “This is a wake-up call for the entire tech industry. No one is safe, not even the richest and most powerful.”

The incident sent shockwaves through Silicon Valley. Big CEOs began reviewing their chat history. Many companies rushed to update their internal privacy policies. Employees feared: Today it was Elon and Sam, tomorrow it could be them.

Behind the giant legal figures lies a valuable lesson: In the digital age, private messages are an illusion. One click of the send button can be evidence against you years later. A bad word in a private conversation can become a headline in the press.

Elon Musk, according to people close to him, is very upset and considers this to be clear evidence that stricter regulations on artificial intelligence and personal data are needed. Sam Altman also tends to remain silent for now. This only fuels public curiosity. The lawsuit between Musk and OpenAI is not just a fight between two companies. \*\*\*
